Mr. Junior:

I was advised by Mr. Sestak that there would be a recording of the November 11 hearing available for members who could not attend due to work/school. I have heard from several who are waiting to listen to the hearing before writing their additional comments to submit to the record. Additionally, there are several others who have advised me they do not think you really want to hear from them because they see nothing on the website showing that an extension through November 23 was granted. They say that you posting the conclusion of recommendation of approval means you already decided and you will not consider their opinions. I would like to request the extension be increased to allow the hearing recording to be put online and people have reasonable time to respond after listening to it. I just received a letter expressing sincere distress over all this from a state not near mine, and the author remained anonymous presumably for fear of retaliation. I beg you to seriously consider an extension as this is a much more serious and widespread problem than you may realize.

Sincerely,

Elaine Benda
