NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of General Casualty Company of Wisconsin (the "Company") are presented on the basis of accounting practices prescribed or permitted by the State of Wisconsin Office of the Commissioner of Insurance.

The State of Wisconsin requires insurance companies domiciled therein to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the State of Wisconsin Office of the Commissioner of Insurance.

At this time there are no differences between Wisconsin prescribed practices and NAIC statutory accounting practice that cause differences for the Company.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires the use of certain critical accounting estimates. It also requires management to exercise judgment in the process of applying the Company's accounting policies. These judgments and assumptions affect the reported amounts of assets and liabilities. Actual results could differ from those estimates. The key areas in which critical estimates and judgments are applied are:

- Reserves for losses and loss adjustment expenses, although supported by actuarial practices and other supportive data are ultimately based on management's reasoned expectations of future events;
- Recoverability of certain insurance and reinsurance balances;
- Income tax assets and liabilities, the recoverability and admissibility of deferred taxes;
- Recognition of liability for legal contingencies;
- Fair value of certain financial assets, impacting those investments measured at fair value.
- The World Health Organization declared a pandemic in relation to the Novel Coronavirus (COVID-19) on March 11, 2020. The outbreak is causing unprecedented social disruption, and global economic and financial markets volatility. The full extent of the exposures to and impacts to QBE North America (QBENA) are uncertain. QBENA is assessing and closely monitoring the emerging risks based on COVID-19 and management believes that the Company will maintain adequate solvency even after the impact of this event.

To the extent actual experience differs from the assumptions used, it is reasonably possible that the statutory financial condition, results of operations and cash flows could be materially affected.

C. Accounting Policy

Premiums and Acquisition Costs

Premium income is earned primarily on a pro-rata basis over periods covered by the policies and is net of reinsurance placed with reinsurers. Extended reporting endorsements premiums are earned on a pro-rata basis over the stated term of the endorsement unless the term of the endorsement is indefinite in which case premiums are fully earned at inception of the endorsement. Multiple peril crop premiums are recorded as of the day when the insurance contract renews (the "sales closing date") and earned over the period of risk in proportion to the insurance protection provided (see Note 35 for further details).

Acquisition costs related to premium income, such as commissions, premium taxes and other underwriting and agency expenses are charged to expense when incurred.

Adjustments to premium (audit premium) for changes in level of exposure to insurance risk are generally determined based upon audits conducted after the policy expiration date. The Company records the additional or return audit premium estimates as an adjustment to written premium and earns these premiums immediately. When any accrued audit premium exceeds the amount of collateral held, a non-admitted asset of 10 percent of this excess amount is recorded. Unearned premiums represent the portion of premiums written but yet to be earned relating to the unexpired term of coverage because the policy has not expired. For policies with coverage periods equal to or greater than thirteen months and generally not subject to cancellation or modification by the Company, premiums are earned using prescribed percentage of completion methods. Unearned premiums are shown as a liability on the Statement of Liabilities, net of ceded unearned amounts.

Insurance premium billed and outstanding for 90 days or more are non-admitted and deducted from unassigned surplus.

If unearned premiums, along with anticipated investment income, are determined to be insufficient to cover expected future losses, loss adjustment expenses, policyholder dividends and administrative costs, a premium deficiency reserve is established. The Company anticipates investment income as a factor in the premium deficiency calculation. The Company determined that no premium deficiency reserve was required to be recorded at December 31, 2021 or 2020.

Reserves for Losses and Loss Adjustment Expenses

Liabilities for losses and loss adjustment expenses represent the estimated ultimate net cost of all reported and unreported losses incurred, net of salvage and subrogation. The Company provides reserves for losses based primarily upon (1) individual case estimates for reported losses on known events; (2) estimates for unreported losses based upon past experience modified for current trends; (3) estimates received relating to assumed reinsurance; and (4) deductions of amounts for ceded reinsurance. The Company provides reserves for loss adjustment expenses by estimating future expenses to be incurred in settlement of claims provided for in the reserves for losses.

Uncertainty is inherent in these estimates. The sources of this uncertainty include, but are not limited to, the following: changes in the standards of liability, current state of coverage of litigation and the law, likelihood of claimants bringing suit and the size of jury awards. The reserve estimates represent management's best estimate given the information currently available; however, it should be recognized that future loss emergence could deviate, perhaps materially, from the recorded estimates.

See Note 33 for further discussion of policies and methodologies for estimating the liabilities and losses for asbestos and environmental claims.

NOTES TO FINANCIAL STATEMENTS

Reinsurance
Under state regulations, insurance companies are permitted to account for risks that have been reinsured with other approved insurance companies, to the extent of the reinsurance and within the limits specified, as though they were not risks for which the Company is liable. However, in the event of nonperformance by reinsurers, the Company remains liable to policyholders.

Reinsurance premiums and losses are accounted for on a basis consistent with those used in accounting for the original policies issued and the terms of the respective reinsurance contracts. Reinsurance is presented on a net basis in the statutory financial statements.

Retroactive Reinsurance
Transactions involving the transfer of loss and LAE reserves which occurred prior to the effective date of the transfer are recorded as retroactive reinsurance reserves and reported separately from reserves for Loss and Loss adjusting expenses in the Statement of Liabilities, Surplus and Other Funds. Initial gains or losses are recorded to Other Income in the Statement of Income with surplus gains recorded as Special surplus funds from retroactive reinsurance which is a component of capital and surplus that is restricted from those eligible for dividend payment. Amounts recorded in Special surplus funds from retroactive reinsurance are amortized into Unassigned surplus when actual retroactive reinsurance recovered exceeds the consideration paid.

To the extent that the transfer of loss and LAE reserves is between affiliated entities and neither entity records a gain or loss, the transaction is accounted for as prospective reinsurance.

Invested Assets and Related Income
Bonds with NAIC designation (as obtained from the NAIC Capital Markets and Investment Analysis Office) of 1 or 2 are carried at amortized cost. Bonds with NAIC designation 3 to 6 are carried at the lower of amortized cost or fair value. Amortization of bond premium and accretion of bond discount are calculated using the constant yield interest method until maturity, or call date, if applicable. Interest accretion/amortization is recorded to net investment income.

Unaffiliated common stocks are carried at fair value.

Short-term investments include money market accounts, Treasury bills and bonds that, when originally acquired, had maturities of one year or less are valued at amortized cost.

Receivables and payables for securities are amounts due to/from the Company for securities which have been sold but the proceeds from the sales have not been received/remitted as of the financial statement date.

Other invested assets consist of investment trusts and are carried at the underlying equity of the fund.

The Company holds preferred stock of one of its subsidiaries. The preferred stock is carried at fair value.

Affiliated common stocks are reported at the affiliated company's statutory equity value of the respective entity's financial statement, with the Company's share of undistributed earnings reflected as a direct credit or charge to unassigned funds as unrealized gain (loss). Derivative financial instruments are accounted for at fair value using quoted prices in active markets and other market evidence where possible, including market based inputs to valuation models, broker or dealer quotations or alternative pricing sources.

The Company has no investments in mortgage loans or loan-backed securities.

Net investment income includes interest and dividends received or accrued on investments. Investment income is recognized when earned. Investment income due and accrued that is deemed uncollectible is charged against net investment income in the period such determination is made, while investment income greater than 90 days past due is non-admitted and charged directly to surplus. Net investment income is reduced by allocated investment expenses.

Adjustments reflecting changes in the carrying value of investments held at fair value are charged directly to surplus as unrealized gains and losses. Realized gains or losses on sales of securities are determined on the basis of specific identification and are charged to income in the period sold based on the trade date of the transaction.

The Company regularly evaluates its investment portfolio for other than temporary impairment of securities. Factors considered in determining whether a decline is other-than-temporary include the length of time a security has been in an unrealized loss position, the severity of decline in book value, reasons for the decline in value, including changes in interest rates, and expectations for the amount and timing of a recovery in value. For the years ended 2021 and 2020, the Company had no other-than-temporary impairments.

When it is determined that a decline in fair value of an investment is other than temporary, the investment is written down to fair value as the new cost basis, and the amount of the write-down shall be accounted for as a realized loss. Any remaining discount or reduced premium, based on the new cost basis is amortized on a prospective basis over the remaining period in which repayment of the principle is to occur.

Federal Income Taxes
The Company is part of the consolidated federal income tax group of QBE Investments (North America), Inc. (QBE Investments), the parent of QBE Holdings. The provision for federal income taxes is computed on a separate return-equivalent basis, based upon taxes currently payable. Income taxes are accounted for under the asset and liability method.

Deferred tax assets and liabilities are recognized for the future federal income tax consequences attributable to differences between the statutory financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted federal income tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The Company evaluates the recoverability of deferred tax assets and establishes a valuation allowance, if necessary, to reduce the deferred tax assets to an amount that is more likely than not to be realized. The remaining deferred tax assets are then assessed for statutory admissibility.

Changes in deferred tax assets and liabilities, including changes attributable to changes in tax rates and changes in tax status, are recognized as a separate component of the change in capital and surplus.

Each insurance company files its own separate state income tax returns, if applicable, except when required to file a state income tax return combined with other affiliates.

Other Accounting Policies
The Company has not modified its capitalization policy from prior period.

The Company has no pharmaceutical rebates receivable.

NOTE 8 Derivative Instruments

- A. Derivatives under SSAP No. 86—Derivatives
- (1) Market Risk, Credit Risk and Cash Requirements
- Credit Risk – Futures and Options
Counterparty exposure is with the clearing house for the exchange, which requires initial and variation margin to be held by the clearing house to mitigate the risk of a party defaulting.
- Market Risk – Futures
If the market falls, the value of the future increases which offsets the loss on the physical assets held in the portfolio. The market risk is managed by limiting the futures positions to a percentage of the portfolio value.
- Market Risk – Call Options
Positions are opened by selling a call option which gives the buyer the right but not the obligation to buy the underlying stock at a specified “strike price”. The seller receives a premium and there are no margin requirements.
- Market Risk – Put Options
Positions are opened by buying a put option which gives the buyer the right but not the obligation to sell the underlying stock at a specified “strike price”. The downside with buying an option is limited to the premium paid to purchase the option and there are no margin requirements.
- (2) Objectives for Derivative Use
- The Company uses financial derivative instruments to hedge against falls in the value of the portfolios and market volatility. The financial instruments used for such purpose include exchange traded equity index options and futures.
- (3) Accounting Policies for Recognition and Measurement
- The Company has accounted for these instruments using fair value accounting; therefore, an assessment of hedge effectiveness is not applicable. The asset or liability is marked to market at each statement date with changes in fair value included in unrealized gains (losses). Upon expiration or other closing transaction, the net consideration received or paid is recognized immediately as a component of realized gains (losses).
- (4) Identification of Whether Derivative Contracts with Financing Premiums
- The Company has no derivative contracts with financing premiums.
- (5) Net Gain or Loss Recognized
- The net realized gain on derivatives as of December 31, 2021 is \$1,521,557.

NOTE 20 Fair Value Measurements

- A.

(1) Fair Value Measurements at Reporting Date
The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

Level 1- Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes money market mutual funds, exchange-traded common stocks and bond options. The estimated fair value of the securities within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2 - Significant Other Observable Inputs: This category for items measured at fair value on a recurring basis includes preferred and common stocks which are not exchange-traded. The estimated fair values were based on quotes from markets which were not considered actively traded.

Level 3 - Significant Unobservable Inputs: The Company has no assets or liabilities measured at fair value in this category.

The table below present assets measured and carried at fair value on a recurring basis. Short term investments and short term bonds are carried at amortized cost and are not included in the table below.

| Description for each class of asset or liability | (Level 1) | (Level 2) | (Level 3) | Net Asset Value (NAV) | Total |
|--|---------------|---------------|-----------|-----------------------|---------------|
| a. Assets at fair value | | | | | |
| Preferred Stocks Subsidiary | \$ - | \$ 6,000,000 | \$ - | \$ - | \$ 6,000,000 |
| Common Stocks Subsidiary | \$ - | \$ 45,148,260 | \$ - | \$ - | \$ 45,148,260 |

| Total assets at fair value/NAV | \$ 12,719,349 | \$ 51,148,260 | \$ - | \$ - | \$ 63,867,609 |

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1and 2. This policy also applies to transfers into or out of Level 3.

- (2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy
The Company has no assets or liabilities measured at fair value in the Level 3 category.

- (3) Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

- (4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

There were no bonds carried at fair market value categorized as Level 2 or Level 3.

- (5) Derivative Fair Values

Derivatives carried at fair value and categorized as Level 1 include bond options. The fair values are based on quoted prices in active markets.

- B. Other Fair Value Disclosures

- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries and joint ventures). Changes in reserve estimates are generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes available.

QBE North America Pooled Companies reported \$309,508,584 in total favorable prior year development since December 31, 2020 to December 31, 2021. This includes a significant decrease of net unpaid loss and LAE reserves in other liability (claims-made) and Assumed Reinsurance due to loss portfolio transfers as described in Note 10. Outside of these loss portfolio transfer agreements, there was adverse net development in property, other liability, and financial lines due to worse than expected claims emergence.

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
Purchase of the Workers' Comp CAT Excess of Loss with \$5M retention

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
The QBE Group Aggregate Management framework is a comprehensive three-prong approach to monitoring and measuring our aggregate exposure globally.
1. CAT Loss Distribution; Probabilistic Catastrophe Models (RMS/AIR, etc.)
1a. Where sophisticated, mature and well accepted probabilistic models are available (e.g. North America Quake, North Atlantic Hurricane, etc), loss distributions estimated from those models drive the quantification of potential catastrophic losses.
2. Realistic Disaster Scenarios (RDS); deterministic perspective
2a. RDS serve the purpose of quantifying potential losses across all perils and classes of business (including those not covered by probabilistic models) and of illustrating events representative of points on the probabilistic loss distributions (e.g. what does an event producing losses in the 100yr-250yr range looks like).
3. Group Aggregate Methodology (GAM); consistent PML factors
3a. Serve the purpose of providing trends in basic exposure changes (not clouded by difficult to understand the intricacies of probabilistic loss distributions/models) and of providing an advanced warning for zones/regions where exposure reaches a level where more sophisticated aggregate analysis for potential CAT losses is required. Underpinning this is our proprietary approach called Realistic Event Methodology (REM) which applies consistent damage ratios to all global exposure concentrations where reliable probabilistic models aren't available. Similar to RDS, GAM/REM enables risk quantification for non-modeled regions and perils.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The company uses RMS v.18 for modeling existing exposures. The Company purchase a comprehensive XOL treaty that protects QBE North America beyond the hurricane and earthquake 100 year PML for peak regions.

Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?

Yes [] No [X]

7.2

If yes, indicate the number of reinsurance contracts containing such provisions:
