

Noncompliance

The Noncompliance page lists all periods of noncompliance, both coverage and financial, for an individual provider. Clicking on Non-Compliance on the Home page shows the compliance status for the group account. Use Provider Search found on the Home page to search for any individual provider. Once in the desired account, clicking on Non-Compliance will show the individual's compliance record. The provider does not need to be linked to your group account to check the noncompliance record.

Coverage noncompliance consists of all times a Fund participant does not have either a certificate of primary insurance or an Exemption on file with the Fund. The Fund participant must file an exemption form or file for retroactive coverage to return to compliance with the Fund.

Financial noncompliance consists of all times that payment was not received on a timely basis for a Fund participant. The participant must file for retroactive coverage to return to compliance with the Fund.

There is no Fund coverage for any period of noncompliance.
